Key Features
• Available flat, twisted, or cord
• Reduction in overall weight & energy usage
• High temperature resistance
• Protection from thermal degradation
• Various colors available for easy identification
• Abrasion resistant

FIBER-LINE® FIBERS FOR WIRE HARNESS YARN
• Kevlar® Para-Aramid
• Nomex® Meta-Aramid
• Technora® Para-Aramid
• PET Polyester

FIBER-LINE® PERFORMANCE ADDING COATINGS
• FIBER-LINE® Colorcoat™: Color Identification
• FIBER-LINE® Wearcoat™: Abrasion & High-Temperature Resistance
• FIBER-LINE® Bondcoat™: Adhesion & Bonding
• FIBER-LINE® Flamecoat™: Flame retardancy

Overview
• FIBER-LINE® provides a wide range of products utilized for wire harnesses. As demand for electrical and electronic content is growing in industries such as automotive, aerospace, and robotics, wire harness designs are more complex and their performance requirements are increasing.
• FIBER-LINE® wire harness yarn allows you to produce thinner, lighter, and more durable products. Since our yarn are lighter and thinner than metal, you can conserve more valuable space and provide greater design flexibility.
• FIBER-LINE® high-performance fibers protect against thermal degradation, resist harsh fluids, and add insulation.
• FIBER-LINE® Colorcoat™ replaces recently discontinued solution-dyed products.

Packaging
FIBER-LINE® Wire Harness Yarn are supplied on a variety of cardboard tubes to meet your equipment needs. Contact us today with tube dimensions you require. Packages can be supplied on colored, embossed and/or slit tubes. Plastic or metal reels are also available.

This data is provided for informational purposes only, and does not constitute a specification. FIBER-LINE® makes no warranty, express or implied, that the product conforms to these values. Contact your FIBER-LINE® representative for exact product details which conform to your specific requirements.
For over 25 years, FIBER-LINE® has provided science-driven expertise that improves the performance and the end-use processing of high performance fibers. Our products enable the search for new energy reserves and extend the life of fiber optic telecommunication cables. They also add important characteristics, such as SWELLCOAT® water-blocking, water repellence, adhesion, color, and wear and UV-resistance to these and many other applications. We believe that our ongoing commitment to protect the environment, to remain at the forefront of fiber and coating technology, and to ‘treat others as we want to be treated’ will continue to drive the success of our customers, shareholders, and employees.
